

# AI DecodeX Hackathon

**Problem :** Past paper analyzer that maps topic frequency against syllabus, ranks high-yield topics, and generates a smart study planner

## Problem Statement

Students often rely on past question papers to prepare for exams but lack a structured way to analyze trends and identify important topics. Manually reviewing multiple years of papers is time-consuming and fails to reveal deeper patterns or question frequency across topics. As a result, students struggle to prioritize high-impact topics and prepare strategically, leading to inefficient study sessions and lower exam performance. Build an AI-powered system that analyzes past papers and syllabus to identify patterns, predict important topics, and guide smarter exam preparation.

**Students / users often struggle with:**

- Identifying which topics appear most frequently across multiple years of question papers.
- Understanding question patterns — phrasing styles, difficulty distribution, and marking schemes.
- Aligning study priorities with the actual exam syllabus and historical trends.
- Spending too much time on low-yield topics while missing high-frequency concepts.

**To solve this, build an AI-powered app that allows users to get:**

- Multi-paper upload — accept past question papers (PDF/image) spanning multiple years and subjects.
- AI pattern analysis — identify topic frequency, question type distribution, and year-wise trends.
- Syllabus cross-referencing — map extracted topics against the official syllabus to highlight coverage gaps.
- Topic importance scoring — rank topics by predicted exam weight based on historical patterns.
- Smart study planner — auto-generate a prioritized study schedule based on analysis results.
- Visual analytics dashboard — charts showing topic frequency, difficulty trends, and coverage heatmaps.
- Practice question suggestions — recommend similar questions for high-priority topics.

## EVALUATION CRITERIA:

- **Impact (20%)** – How effectively does it work?
- **Innovation (20%)** – Is the approach creative and unique?
- **Technical Execution (20%)** – Code quality and functionality including ReadMe file quality.
- **User Experience (25%)** – Design, ease of use; **hosted and publicly accessible solutions will receive bonus consideration.**
- **Presentation (15%)** – Quality of demo video and explanation. Record your demo video and upload on google drive and put the link in your ReadMe file of github Project.

## Submission Guidelines:

- Users must submit the **link to their GitHub repository** on the competition portal (Unstop, where you completed your hackathon registration).
- The **GitHub repository must be public**. Private repositories will lead to **disqualification**.
- The **complete source code of the project must be present in the repository**. Submissions without code will not be considered valid.
- **Mandatory:** Include a **screen-recording video link of your live, working project** in the **README.md** of your GitHub repository.
- **Hosting the project** is optional but will give you an edge during evaluation.

## FAQs

### Q. What Tech Stack to use?

A. You can use any tech stack as per your expertise.

### Q. Can I use AI to build the solution?

A. Yes you can use AI Tools like ChatGPT, Emergent, Co-Pilot etc. to build the solution for rapid prototyping. But make sure you understand the platform that you have built.

### Q. Will I get a certificate?

A. Yes, but only if you have done a Valid Submission.

### Q. When will the results be announced?

A. The results will be announced within a week's time of the hackathon submission.

### Q. When will the certificates be given?

A. Certificates will be issued only to Valid submissions defined as public gitHub Repository and a working prototype as per the problem statement. The certificates will be issued within 7 Days of the hackathon.

**Q. How will I get the certificate?**

**A.** You will get a digital verifiable certificate via your email within 7 days of the hackathon.

**Q. How much time do I have to make the submission?**

**A.** Submission Deadline is 3rd May, 2026 06:00 PM. You can check Unstop Portal.

**Q. I have more doubts, how can I contact the UnsaidTalks Team?**

**A.** You can reach out @ +91-7303573374 on whatsapp or @ info@unsaidtalks.com if you have any doubts or feedback for us.

**Q. Where do I have to submit the solution?**

**A.** You need to upload the code in your public github repository and submit the link on the unstop portal where you did registration.

**Q. Who is organizing this Hackathon?**

**A.** This hackathon is organised by UnsaidTalks Education ([www.unsaidtalks.com](http://www.unsaidtalks.com)) — one of India's leading mentorship platforms that has helped **1000+ students become interview-ready** and crack **internships and full-time roles** through guidance from industry professionals at **Google, Amazon, Microsoft, and other top tech companies.**

At UnsaidTalks, we run our flagship **UnsaidTalks Mentorship Program**, designed to help you **build strong fundamentals, gain real clarity on interview preparation, and follow a structured roadmap** that most students miss out on while preparing alone.

Many students who delay structured preparation often struggle during placement season — **don't miss the chance to get guided support early and stay ahead of the competition.**

You can explore the program here:
